Stainless Steel Flatware Process Flow Chart:

In order to ensure product quality, each piece of flatware must be carefully forged through dozens of processes.

A brief summary is 25 processes. In actual operation, cleaning runs through the entire process, 4 times of grinding and 3 times of polishing, 2 times of quality inspection and so on.

A product has to go through at least 31 processes.

18/8 or 18/0 STAINLESS STEEL

The flat, broad handle of cutlery delivers a minimalist approach to the dining experience. The square base, satin finish and tapered lines of the handle are strong yet sleek. It features a mirror polished surface that not only adds a touch of sophistication to your table, but also makes cleaning a breeze.
